< LANGUAGES />

JavaScript (ES6), React.js +Redux, Android, Kotlin

< RELEVANT EXPERIENCE />

Kroger | October 2018 - Present

APPRENTICE ANDROID ENGINEER

- Worked on the core Kroger Android app (bug fixes, new feature development, refactoring legacy code, testing, etc).
- Built internal tools to optimize the testing process later integrated into a company-wide testing application.
- Worked one-on-one with a Senior Developer mentor, learning best practices, team performance, and corporate operations.

The Good | July 2018 - August 2018

FRONTEND CRO DEVELOPER

- Build enterprise and e-commerce web and mobile components from wireframes and implement A/B tests on a variety of websites using VWO and jQuery. Strategic discussions and focus on optimizing CRO.

uGyde | July - August, 2018

LEAD FRONTEND DEVELOPER

- Took over a team building a web and mobile application built with Node, React, and Firebase.
- Led both an architecture and design reorganization of the project, focusing on optimizing performance and branding.

Self-Employed | June 2013 - September 2016

WEB DESIGNER

- 25+ client personal and commercial projects on cPanel and Wordpress.
- Honed a strong ability to communicate with each client in order to design and optimize a site and a brand suited to their needs.

< OTHER PROJECTS />

Deep Focus | MERN Stack App

- Tech Lead on Fullstack web app allowing registered users to review films, with SASS style, multiple APIs, and Jest testing.
- Wrote the functionality of the React/Redux frontend and designed data routes from end-to-end.

Dad Joke Library | Fullstack JavaScript App

- Lead Front End Developer using Page.js and RESTful API architecture with Mongoose + MongoDB on an Express backend.
- Built with TDD testing using Mocha and Chai.

< EDUCATION />

ALCHEMY CODE LAB

Advanced Fullstack Javascript Track 2018

800+ hour MERN-stack professional training focusing both on clean code and team-building, individual problem solving, and TDD testing with Jest and Mocha..

Included RESTful APIs, and multiple fullstack React / Redux apps.
